PROJECT OVERVIEW

INTRODUCTION

Welcome to Black Band Token!
Black Band Token offers a first class investment opportunity and is backed by a team that lives life in service to others and lives the value of integrity without compromise. Our project is set to be the most impactful token released in 2023. Our investors have the opportunity to make money without the risk of being scammed, while our project will help benefit the families of those that have paid the ultimate sacrifice.

Black Band Token is not just another memecoin. It's the door to a secure investment opportunity that empowers you to buy with confidence, sell with ease, and impact the community around us in a positive way. Black Band Token has two key functions.

The primary function that impacts the majority of our buyers, as mentioned above, is to give investors a safe place to invest and open the door to make some serious money. This will be driven by volume, the community, and partnerships. The secondary function of this project is to offer support to families in the community who have had a family member pay the ultimate price and lost their lives while serving and protecting.

But Black Band Token is more than just a token; it's a community-driven movement. We believe in the power of collaboration and education. Our project is working toward providing valuable resources and insights into crypto as a whole, enabling you to navigate the dynamic world of all things crypto with confidence.

PROJECT PURPOSE

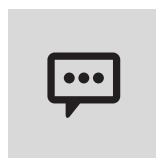

As previously mentioned, Black Band Token was created with two things in mind. Our drive is to truly create a community, an investment, and a team that is worth investing in. This is intended to be a place where people can buy and sell Black Band Token in an effort to make

money and not have to worry about being scammed because we understand that people are mostly concerned about making a profit. That's why 99.9% of people buy into a project. The second purpose is to make an impact on families going through trauma. See below:

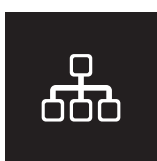

Taxes

Taxes from the token are used to improve the project value.

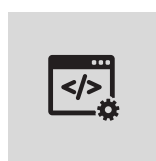

Community Centered

Our community is the center of our project. Community engagement drives all!

Family Funds

Family Funds will be used to help families who have suffered the loss of a loved one.

Fair Launch

No presale tokens, no dev tokens, and no early buys. Everyone has the same chance to buy first.

Liquidity

A portion of the taxes are used to add liquidity. This liquidity builds a solid price over time.

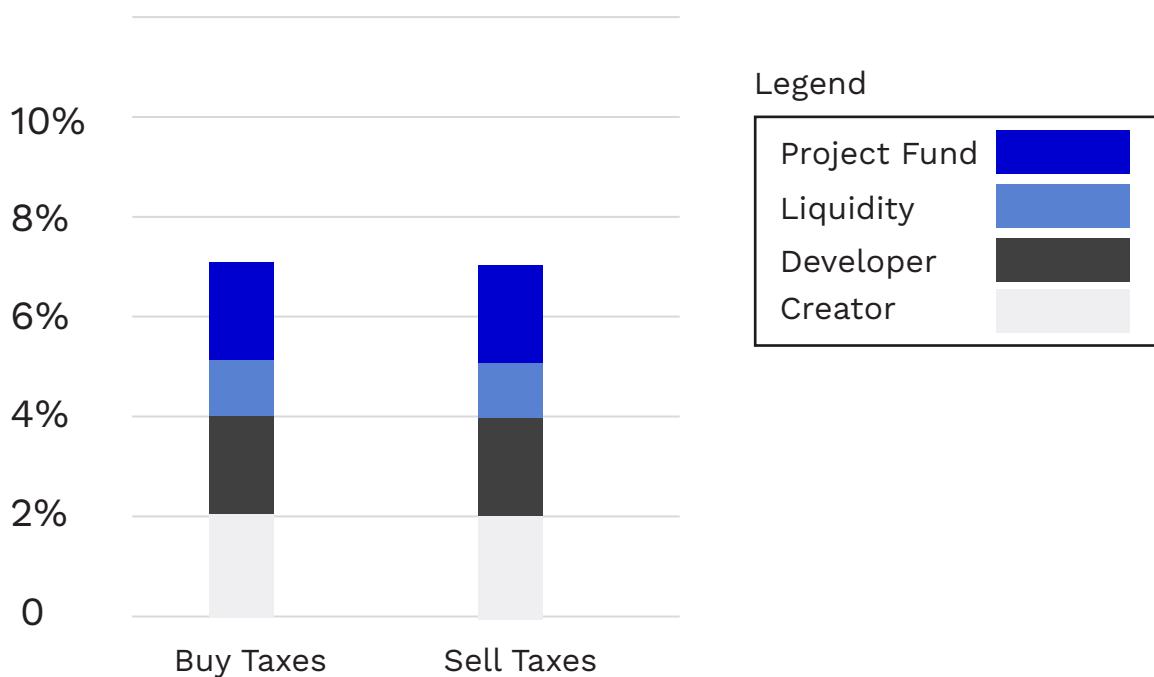

Anti Whale

Wallet and transaction limits have been put in place to limit the impact of dumping.

PROJECT TOKENOMICS

Black Band Token was created with the intention of continuing growth long term. Our team has a vested interest in the success of the token as token success rewards all holders equally. 100% of the tokens will be added to the liquidity pool. There is no presale, team tokens, or other wallets. You'll have to buy tokens like the rest of us!

The Developer Taxes are intended to be used by the developer of the project to ensure he or she is able to continue supporting the community as much as possible.

The Creator Taxes are intended to be used by the contract creator in a way that will allow him or her to focus on the project success.

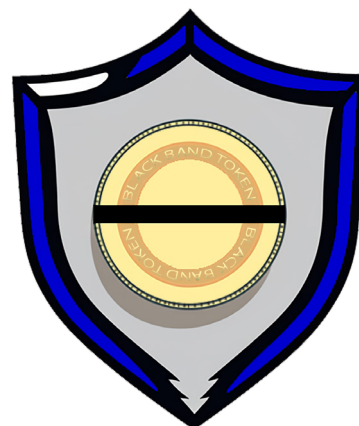

Buy Taxes	2% Project	1% Liquidity	2% Developer	2% Creator
Sell Taxes	2% Project	1% Liquidity	2% Developer	2% Creator

PROJECT SECURITY

With a background in Cybersecurity, we can assure you that we take security very seriously. Our team has written the contract in a way where it allows you as the investor to feel safe buying in. If you take the time to read through the contract, you will find that there are several different functions in place to help our investors feel safer. We have also used several utilities to test, verify, and enhance security within the project and the contract.

The first utility that we used is the MythX Security Verification. This provides a log of all security vulnerabilities. At this time, there are no known vulnerabilities using this tool. The second utility that was used to audit the contract was De.Fi's Free Smart Contract Audit. Lastly, we are submitting the final version of the contract to TechRate for an audit. We anticipate that this audit will return very similar results.

We have intentionally made the taxes static so there is not fear of increasing taxes. We have not included a "pause trading" function. We do not have the ability to block accounts from buying or selling at any time. The contract has implemented a measure where taxes cannot be adjusted, the max transaction size can only be set higher than the original 2.5%, and the max wallet size can also only be set to a larger amount than the original 2.5%.

PROJECT REVENUE

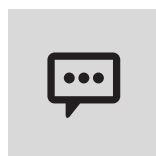

Black Band Token has created a way to continue driving token value while creating a multiple services that were built intentionally to provide value for our holders, for the crypto community at large, and for those that aren't in the crypto community.

The project currently has two different revenue generating functions in development. The first revenue generating function allows holders of the token to handle business without having to cash out crypto. The second function will help people successfully interact with LEAs.

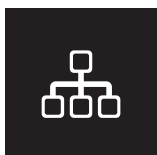

Future Growth

The Development Team is committed to working on a novel revenue generating tool.

Tutorials

Our project will have customer focused material on LEA interactions.

Investment

All fees are reinvested into the project using the same distribution as the taxes.

Content

This content will have you in mind. It'll be custom created to meet your needs.

Ease of Use

Our system makes it easy for holders benefit from the revenue generating function once released.

Buybacks

All funds generated through the content created will be reinvested into the project through buybacks.

PROJECT **Utility**

Black Band Token has successfully created a new utility to allow people in the crypto space to pay their fines, traffic violations, citations, and judgements using Ethereum. This allows users the freedom to avoid paying high gas or conversion fees or worrying about when to handle the process. Our convenience fee covers all of that, including the fees that are normally charged when paying online! Users can register an account to being using FinePay today!

The benefit of this utility for the holders of Black Band Token is that 80% of the profit is going to be split among the holders of Black Band Token. This profit sharing will be paid out in Eth so that you are not required to sell your Black Band Token to take profit. We have truly been intentional when creating this project to ensure value for all holders.

FINEPAY

What Is FinePay?

Citations

You can also pay your citations online with crypto!

Ticket

You can also pay your traffic tickets online with crypto!

Court Judgements

You can also pay your court judgements online with crypto!

Something Else?

If you're looking to pay seomthing else online just let us know!

The additional 20% of profit will be used for continued project expansion, marketing, and growth. This includes compensation to those that are helping out the project, contests, giveaways, and promotion through well recognized influencers. We will also continue working with marketing in the real world in order to bring additional buyers into the project that currently do not hold Black Band Token.

The success of the project utility hinges upon getting the world out into the crypto space and beyond! The more users utilizing the platform, the more profit sharing we can offer. Let's get this growing!

PROJECT ROADMAP

Prelaunch

- Create Website
- Create Contract
- Test Contract
- Create Telegram

Phase 1

- Build Up Community
- Build Up Social Presence
- Publicize Open Nominations for Families
- Select First Recipient Family
- Launch Contract
- Add Liquidity
- Lock Liquidity
- Illicit Community Feedback

Phase 4

We intentionally left Phase 4 open ended. We intend to continue growing this project based on the feedback of the community. Our development team is also working on other components of the project that continue the growth of the project while honoring the purpose behind the creation of this project. If you feel as though you have an idea that can contribute to the growth of this project, please feel free to reach out to admin@blackbandtoken.com or chat with us in our Telegram at <https://t.me/blackbandtoken>.

Phase 2

- Partner With Unions
- Blow Up Social Presence
- Start Revenue Generation Pre-Work
- Select Second Recipient Family
- Extend Locked Liquidity
- Illicit Community Feedback

Phase 3

- Continue Community Growth
- Select Additional Recipient Families
- Beta Test Revenue Generation Functionality
- Expand Project Purpose
- Partner with Crypto Projects
- Illicit Community Feedback
- Community Content
